

Food Chains

Food chains are systems of energy transference. What is the energy source of any food chain? _____

Here is an example of a food chain.

grass

beetle

spider

sparrow

cat

Go to Jackson's pond. Look for a food chain that is a part of the pond habitat. Make a drawing and label each part as a producer, consumer, or decomposer.

Make a food chain on the back that might be found in the field or woods habitat.
