

# Kentucky Core Content Test: Reading

**Definition:**

This test assesses student mastery of Core Content in Reading. The test is taken by students in grades 3-8, 10 and 11 each year. It contains multiple-choice and open response (essay-like) questions; scores are reported in performance levels of Novice, Apprentice, Proficient, and Distinguished.

**Analysis:**

The percentage of students scoring Proficient or higher in Reading increased last year at all three levels.

Elementary schools have the highest percentage of students scoring Proficient or higher, followed by high schools and then middle schools.

**Goals:**

The 2009-10 NCLB goal is to have 68.7% of students scoring Proficient or Distinguished in Reading. The district met its overall goal, but not all student groups met the goal.

**Data:**

The next pages report the proficiency rates over the past three years for each school as well as for each NCLB student group for the most recent school year. This data is sorted (1) alphabetically and by (2) schools with similar demographic characteristics (need index).

# KCCT Reading 2009-2010: Disaggregated

**Definition:**

This test assesses student mastery of Core Content in Reading. The data below represents the percentage of students scoring Proficient or higher for each of the NCLB student groups for the 2009-10 school year.

**Analysis:**

The proficiency rates vary across different student groups. Overall, Asian students and then White students have the highest percentages of students scoring Proficient. Students with disabilities and limited English proficiency have the lowest proficiency rates. The proficiency pattern among student groups vary slightly across the levels.

# Kentucky Core Content Test: Math

**Definition:**

This test assesses student mastery of Core Content in Math. The test is taken by students in grades 3-8, 10 and 11 each year. It contains multiple-choice and open response (essay-like) questions; scores are reported in performance levels of Novice, Apprentice, Proficient, and Distinguished.

**Analysis:**

The percentage of students scoring Proficient or higher in Math has decreased slightly over the last three years at the elementary and high school level and remained stable at the middle school level.

Elementary schools have the highest percentage of students scoring Proficient or higher, followed by middle schools and then high schools.

**Goals:**

The 2009-10 NCLB goal is to have 59.8% of students scoring Proficient or Distinguished in Math. The district did not meet its overall goal and not all student groups met the goal.

**Data:**

The next pages report the proficiency rates over the past three years for each school as well as for each NCLB student group for the most recent school year. This data is sorted (1) alphabetically and by (2) schools with similar demographic characteristics (need index).

# KCCT Math 2009-2010: Disaggregated

**Definition:**

This test assesses student mastery of Core Content in Math. The data below represents the percentage of students scoring Proficient or higher for each of the NCLB student groups for the 2009-10 school year.

**Analysis:**

The proficiency rates vary across different student groups. Overall, Asian students and then White students have the highest percentages of students scoring Proficient. Students with disabilities and students with limited English proficiency have the lowest proficiency rates. The proficiency pattern among student groups varies slightly across the levels.

# Kentucky Core Content Test: Science

## Definition:

This test assesses student mastery of Core Content in Science. The test is taken by students in grades 4, 7, and 11 each year. It contains multiple-choice and open response (essay-like) questions; scores are reported in performance levels of Novice, Apprentice, Proficient, and Distinguished.

## Analysis:

The percentage of students scoring Proficient or higher in Science has decreased slightly at the elementary, middle and high school level over the last four years. Last year, elementary and high schools remained stable.

Elementary schools have the highest percentage of students scoring Proficient or higher, followed by middle schools and then high schools.

## Goals:

The goal for elementary schools is 59%, middle school is 54%, and high school is 47% scoring Proficient or Distinguished in Science.

## Data:

The next pages report the proficiency rates over the past three years for each school as well as for each NCLB student group for the most recent school year. This data is sorted (1) alphabetically and by (2) schools with similar demographic characteristics (need index).

# KCCT Science 2009-2010: Disaggregated

## Definition:

This test assesses student mastery of Core Content in Science. The data below represents the percentage of students scoring Proficient or higher for each of the NCLB student groups for the 2009-10 school year.

## Analysis:

The proficiency rates vary across different student groups. Overall, Asian students and then White students have the highest percentages of students scoring Proficient. Students with limited English proficiency and students disabilities have the lowest proficiency rates. The proficiency pattern among student groups is similar across the levels.

# Kentucky Core Content Test: Social Studies

## Definition:

This test assesses student mastery of Core Content in Social Studies. The test is taken by students in grades 5, 8 and 11 each year. It contains multiple-choice and open response (essay-like) questions; scores are reported in performance levels of Novice, Apprentice, Proficient, and Distinguished.

## Analysis:

The percentage of students scoring Proficient or higher in Social Studies has remained stable at the elementary level, but has decreased slightly at the middle and high school levels over the last three years.

Elementary schools have the highest percentage of students scoring Proficient or higher, followed by middle schools and then high schools.

## Goals:

The goal for elementary schools is 57%, middle school is 52%, and high school is 50% scoring Proficient or Distinguished in Social Studies.

## Data:

The next pages report the proficiency rates over the past three years for each school as well as for each NCLB student group for the most recent school year. This data is sorted (1) alphabetically and by (2) schools with similar demographic characteristics (need index).

## JCPS Elementary School - % Students Scoring Proficient or Distinguished in Social Studies Trend Data 2008-2010

# KCCT Social Studies 2009-2010: Disaggregated

## Definition:

This test assesses student mastery of Core Content in Social Studies. The data below represents the percentage of students scoring Proficient or higher for each of the NCLB student groups for the 2009-10 school year.

## Analysis:

The proficiency rates vary across different student groups. Overall, Asian students and then White students have the highest percentages of students scoring Proficient. Students with Limited English Proficiency and disabilities have the lowest proficiency rates. The proficiency pattern among student groups differs slightly across the levels.

# Kentucky Core Content Test: Writing on Demand

## Definition:

This test assesses student mastery of Core Content in Writing on Demand. The test is taken by students in grades 5, 8, and 12 each year. Students at grades 5, 8 and 12 complete a writing task that addresses a prompt. Grades 5 and 8 tests also include passage-based multiple choice editing/revising items. Scores are reported in performance levels of Novice, Apprentice, Proficient, and Distinguished.

## Analysis:

The percentage of students scoring Proficient or higher in Writing on Demand has remained stable at all three levels over the past year.

Elementary schools have the highest percentage of students scoring Proficient or higher, followed by high schools and then middle schools.

## Goals:

The goal for elementary schools is 56%, middle school is 44%, and high school is 52% scoring Proficient or Distinguished in Writing On-Demand.

## Data:

The next pages report the proficiency rates over the past three years for each school as well as for each NCLB student group for the most recent school year. This data is sorted (1) alphabetically and by (2) schools with similar demographic characteristics (need index).

# KCCT Writing On Demand 2009-2010: Disaggregated

## Definition:

This test assesses student mastery of Core Content in Writing on Demand. The data below represents the percentage of students scoring Proficient or higher for each of the NCLB student groups for the 2009-10 school year.

## Analysis:

The proficiency rates vary across different student groups. Overall, Asian students and then White students have the highest percentages of students scoring Proficient. Students with Limited English Proficiency and disabilities have the lowest proficiency rates. The proficiency pattern among student groups is the same across levels.

2009-2010 Percentage of Students Scoring Proficient or Higher on KCCT Writing on Demand - JCPS Elementary Schools

# Attendance 2009-2010

## Definition:

Attendance rate is calculated by dividing the aggregate number of days present by the sum of the aggregate days present and days absent

## Analysis:

The attendance rates for middle and high schools have increased over the last three years. At the elementary level, the rate has fluctuated but the 2009 rate is similar to 2007.

Elementary schools have the highest attendance rate, followed by middle schools and then high schools.

## Goals:

The goal for elementary schools is 96%, middle schools is 95%, and high schools is 94%. To improve attendance by 1% across the district, schools would need to get every student to come 2 more days to school during the school year.

## Data:

The next pages report the attendance rates over the past three years for each school as well as for each NCLB student group for the most recent school year. This data is sorted (1) alphabetically and by (2) schools with similar demographic characteristics (need index).

# Attendance 2009-2010: Disaggregated

## Definition:

Attendance rate is calculated by dividing the aggregate number of days present by the sum of the aggregate days present and days absent. The data below represents the attendance rates for each of the NCLB student groups for the 2009-10 school year.

## Analysis:

The attendance rates vary across different student groups. Overall, Asian students have the highest rate of attendance and students with disabilities and free/reduced lunch students have the poorest attendance rates. The attendance pattern among student groups differs across levels.

# Student Absences: Missing 20 Days or More

## Definition:

Student absence is calculated by dividing the number of students missing 20 days or more by the total number of students enrolled in a school

## Analysis:

The percentage of students missing more than 20 days for all levels (elementary, middle and high) has decreased over the last three years.

Elementary schools have the lowest percentage of students missing 20 days, followed by middle schools and then high schools.

## Goals:

Missing 20 days throughout the school year is equivalent to missing 2 days per month. To reduce the percentage of students with chronic absenteeism, these students need to attend school 2 more days per month. The goal for elementary schools is 5%, middle schools is 10%, and high schools is 15%.

## Data:

The next pages report absences over the past three years for each school as well as for each NCLB student group for the most recent school year. This data is sorted (1) alphabetically and by (2) schools with similar demographic characteristics (need index).

# Absences (20 Days or More) 2009-2010: Disaggregated

## Definition:

Student absence is calculated by dividing the number of students missing 20 days or more by the total number of students enrolled in a school. The data below represents the percentage of students missing 20 days or more for each of the NCLB student groups for the 2009-10 school year.

## Analysis:

Chronic absenteeism varies across different student groups. Overall, Asian students have the fewest percentage students missing 20 days or more, while students with disabilities and free/reduced lunch students have the largest percentage of students missing 20 days or more. The attendance pattern among student groups differs levels.

# Student Suspensions: Out of School

## Definition:

Percentage of students suspended is calculated by dividing the number of students with at least one out of school suspension (ssp3) by the total number of students enrolled in a school.

## Analysis:

The percentage of students with an out-of-school suspension has remained stable over the last four years at elementary level, has fluctuated some at the middle level, and has increased at the high school level.

Elementary schools have the lowest percentage of students suspended, followed by middle schools and then high schools.

## Goals:

The goal for elementary schools is 1.5%, middle schools is 10%, and high schools is 12%. By reducing the number of students and days students are suspended, schools could increase their attendance rates.

## Data:

The next pages report % of students suspended over the past three years for each school as well as for each NCLB student group for the most recent school year. This data is sorted (1) alphabetically and by (2) schools with similar demographic characteristics (need index).

JCPS Elementary School - % Students with Out-Of-School Suspension

# Student Suspensions 2009-2010: Disaggregated

## Definition:

Percentage of students suspended is calculated by dividing the number of students with at least one out of school suspension (ssp3) by the total number of students enrolled in a school. The data below represents the percentage of students who were suspended for each of the NCLB student groups for the 2009-10 school year.

## Analysis:

The percentage of students suspended varies across different student groups. Overall, Asian students have the fewest percentage of students suspended. However, African American, students with disabilities are disproportionately suspended at greater percentages. The suspension pattern among student groups varies slightly across levels.

2009-2010 Percentage of Students with Out-Of-School Suspension - Elementary Schools

# Graduation Rate

## Definition:

Graduation rate defined as the percentage of students entering a high school in the ninth grade that graduate in four years.

Kentucky's Current Method – NCES Leaver Graduation Rate takes the number of on-time graduates with a diploma plus the number of graduates with a diploma that have extended time written into their Individualized Education Plan (IEP) divided by the summation of the number of on-time graduates with a diploma; plus the number of graduates with a diploma that have extended time written into their IEPs; plus the number of graduates with a diploma who took more than four years to graduate; plus completers who received a certificate of attainment or GEDs; plus the number of 12th-grade dropouts for current year; plus the number of 11th-grade dropouts for the prior year; plus the number of 10th-grade dropouts for two years before; plus the number of 9th-grade dropouts for three years before.

## Analysis:

The high school graduation rate has fluctuated over the last three years, yet the 2009 rate is similar to the 2007 rate. However, the JCPS rate remains below the state level.

## Goals:

The 2009 goal for high schools is 86.75%. Graduation rates less than 60% for three consecutive years qualify schools as persistently low achieving.

## Data:

The next pages report the graduation rate over the past three years for each high school. This data is sorted alphabetically.

# moving away from goal	8	

# Student Retention

**Definition:**

Percentage of students who are retained is calculated by dividing the number of K-12 students who are enrolled in a JCPS school for two consecutive years and are in the same grade level at the end of both years by the total number of K-12 students enrolled in JCPS both years.

**Analysis:**

The percentage of students who are retained has decreased over the last three years at the elementary and high school level and has remained relatively stable at the middle school level.

**Goals:**

The goal for primary level is 1%, intermediate level is .15%, middle school is .5%, and high school is 2%. By reducing the number of students who are retained, schools could reduce the number of potential drop-outs.

**Data:**

The next pages report % of students retained over the past three years for each school as well as for each NCLB student group for the most recent school year. This data is sorted (1) alphabetically and by (2) schools with similar demographic characteristics (need index).

# Student Retention: Disaggregated

## Definition:

Percentage of students who are retained is calculated by dividing the number of K-12 students who are enrolled in a JCPD school for two consecutive years and are in the same grade level at the end of both years by the total number of K-12 students enrolled in JCPD both years. The data below represents the percentage of students who were suspended for each of the NCLB student groups for the 2010-11 school year.

## Analysis:

The percentage of students who are retained varies across different student groups. Overall, students with limited English proficiency and students with disabilities have the highest percentages of retained students. The retention pattern among student groups varies across levels.

# Teacher Attendance

## Definition:

Teacher Attendance is calculated by dividing the total number of days present or on professional leave by the sum of the total days present and days absent. Absent days include sick, personal or emergency days. The attendance rate only includes active, full-time teachers and does not include teachers on long-term leave. Long-term leave includes anyone absent over 60 days (i.e. long term disability, child rearing, family and medical leave, etc.)

## Analysis:

Teacher attendance decreased from last year, but the 2010 rate is similar to 2007 at all three levels.

High schools have the highest teacher attendance, followed by middle schools and then elementary schools.

## Goals:

The goal is 95% for all levels. The expectation is that schools with high teacher attendance will foster high student attendance.

## Data:

The next pages report the teacher attendance over the past three years for each school. This data is sorted alphabetically.

Note: The 2010 attendance data is through the 6/11 pay date and has not been audited
